

# GREEN SPRINGS

## Performance Tested Bull Sale

Sunday, March 21, 2010

**1:00 PM (CST)**

***At the MO-KAN Sale facility in Passaic, Mo.  
60 miles south of Kansas City on Hwy. 71***

This sale will feature 20 outstanding Black Maine-Anjou bulls sired by some of the elite Maine-Anjou sires in the breed for calving ease, carcass traits and great maternal values.

### Available Information:

- RFI (residual feed intake — feed efficiency) • Average daily gain
- Weight per day of age • Ultrasounded for backfat, marbling and REA
  - Pelvic measured • Semen checked
- Breed EPDs • All bulls tested NEGATIVE for PI BVD

Maine-Anjou bulls were the most efficient OVER ALL BREEDS with a -1.27 RFI. Every Maine-Anjou bull was negative for RFI. The 2009 stats: average live weight of 1200 lbs., ADG of 4.01, WDA of 3.26, REA of 15.6 square inches and IMF of 3.73

Maine-Anjou bulls used in crossbreeding programs provide added heterosis for 25% more weaning weight, 17% more calves and a 38% increase in the lifetime production of the cow.

To increase your bottom line, consider Maine-Anjou -
