

MAINE-ANJOU PERFORMANCE PROGRAM  
(MAPP)

New Members or Dues-Paying Members that have not yet enrolled in a program.

We currently have two programs in which you need to choose to enroll your membership. Please read through the information given below, then clip and return the enrollment form, to our office as soon as possible.

A **MAPP** (Maine-Anjou Performance Program) participant will:

- receive EPDs on registered progeny
- if not registered, but data reported, you may request a performance pedigree (\$10 per animal)
- if not registered but reported, data will be a part of AMAA performance program but not available to the breeder
- must keep an active female list
- will be invoiced on annual basis \$5 for each active female
- registration rates will remain at regular registration fee price (reference enclosed self-billing worksheet)

A **BREEDERS CHOICE** participant will:

- not receive EPDs on registered progeny
- registration fees will be higher (reference enclosed self-billing worksheet)

Please feel free to contact the AMAA office at 816.431.9950 if you have any questions on either of these programs. PLEASE NOTE: **EACH MEMBERSHIP HAS TO BE ENROLLED IN EITHER MAPP OR BREEDERS CHOICE.**

Clip and return this form to the AMAA office

---

-----  
All active AMAA and AJMAA members must designate their membership as Breeders Choice or Maine-Anjou Performance Program (MAPP). Work cannot be processed if this form has not been returned. Please carefully read through the guidelines given above on each program to determine the program in which you will enroll.

Place an X next to the option you choose:

- ( ) Breeders Choice
- ( ) Maine-Anjou Performance Program (MAPP)

## MAPP REGULATIONS

1. All registered Maine-Anjou and MaineTainer females are included in the MAPP program. Registered females of another breed or commercial females will not be charged the active female fee.
2. A member's registered active female herd can only be a part of either MAPP or Breeders Choice, herd must be enrolled in MAPP in order to attain EPDs on progeny (if all AMAA performance criteria is met).
3. For those members who do enroll in MAPP, inventories will be sent in late summer with a noted date of return. A penalty will apply to those inventories returned after posted deadline. (Deadline will be on or near October 1<sup>st</sup>.)
4. Invoicing of \$5 per head of active females of MAPP enrollees will take place starting in January of each year.
5. When a herd is enrolled in MAPP, an active female must be enrolled in order to transfer.
6. Stated registration and transfer fees will apply to progeny of MAPP females.
7. Non-registered progeny data will be a part of the system but not available to breeder unless the breeder requests a performance pedigree at a cost of \$10 per animal.
8. A reactivation fee of \$50 applies only when cattle are declared on the MAPP inventory, dropped, and then reactivated.
9. Multiple-owned females must be on each individual member's inventory in order to register progeny.
10. One of the following must be received at the AMAA office for each female inventory:
  - a. A calf record, inclusive of AMAA performance record requirements
  - b. A disposal code on the cow
  - c. A calving code for non-live calves
11. When a female is purchased from a herd participating in the Breeders Choice program by a herd participating in MAPP, the MAPP member must pay the current year annual active fee (\$5) in order to activate the female on the inventory list.

Without a doubt, there will be situations that are unforeseen and will need to be handled on a one-on-one basis. In those situations, the Executive Vice President will make the decision.

The American Maine-Anjou Board of Directors recognizes that change does not always come easily but truly believes that MAPP offers breed stability along with long-term growth and a wider arena for Maine-Anjou genetic acceptance.
